

Momondo Launches New Hotel Site

The team behind the travel site, Momondo.com, has created the brand new hotel search site www.momondohotels.com.

Momondo.com has many years of experience in developing a price comparison site making it possible for consumers to find and compare the best offers on flights. This time we have put a lot of energy and know-how into creating a user friendly hotel search engine.

Momondohotels.com searches and compares prices on **450.000+ hotels** in cities all over the world. It searches across different hotel sites as the price of a room often varies from agent to agent.

We find hotels **close to your favourite locations**. Just place your marker on the city map and all nearby hotels are displayed.

The search engine shows you **Momondo Best Choice** hotels. Finding the right room is much more than a matter of price. Momondo Best Choice hotels is our recommendation of hotels with the highest score based on central location, price, star rating and user reviews.

If you have other preferences you can always customize your search and we will find hotels that match you and your needs.

The idea behind www.momondohotels.com is to give the consumer as much as possible inspiration and information about hotels before booking.

“We have created a site that searches and compares the best offers on hotels from the most important hotel suppliers and which enables the consumers to find hotels that match their needs – fast and easy! Our mission is to make it easier for the consumer to find the perfect hotel when booking online”, says Momondo-partner, Martin Lumbye.

According to figures from the European Union there were 21 million more overnight stays at hotels in the EU from June to September 2010 than during the same months the previous year. The increasing demand on hotel rooms has led to a rise in prices making a hotel price comparison site like Momondohotels.com an even more useful tool when finding and booking a hotel.

About Momondo:

Momondo is a travel search engine founded in 2006 by experienced people from the travel industry and skilled programmers with a passion for new technology and travelling. The search engine finds and compares the best offers on flights, hotels and car rental and link to the suppliers. In addition to offering online search Momondo provides user-generated city guides and is one of the largest publishers of print guidebooks in Denmark.

Momondo searches more than 800 travel sites and has been recommended by international media such as The New York Times, CNN and The London Sunday Times.
